

YAMAN NISHAD

Red Team Associate • VAPT Analyst • AI-Assisted Offensive Security

Uttar Pradesh, India • yamanoofficial47@gmail.com • +91 9118402628 [Linkedin](#) | [GitHub](#) | [TryHackMe](#) | [YouTube](#) | [Instagram](#) | [YamanRedTeam-Website](#)

PROFESSIONAL SUMMARY

Offensive security professional specializing in AI-assisted offensive security, combining established VAPT methodology with modern AI-driven workflows. Perform Red Team, VAPT, API Security, Web Application Security, and Active Directory assessments using Claude Code, MCP workflows, and AI-assisted tooling to support reconnaissance, attack path analysis, and reporting. Hands-on experience with Burp Suite, Nmap, BloodHound, Metasploit, Splunk, Impacket, and Nessus, applying MITRE ATT&CK, OWASP, and PTES. Holds CRTA, WEB-RTA, API-RTA, COPO, MCBTA, and ISC² CC certifications, with a focus on practical assessments, structured reporting, and applied research.

PROFESSIONAL EXPERIENCE

Penetration Testing Intern — VAPT • HCLTech

Mar 2026 – May 2026

- Conducted structured VAPT on 3 Windows environments (Server 2008 R2, Server 2019, Windows 10) using AI-assisted reconnaissance workflows (Claude Code, MCP); identified and documented 12+ vulnerabilities categorized by CVSS v3 severity across network and host layers.
- Exploited MS17-010 (EternalBlue) via Metasploit to obtain SYSTEM-level access; performed post-exploitation including credential dumping (Mimikatz), lateral movement, and privilege escalation on isolated lab targets.
- Performed web application security testing using Burp Suite on DVWA; identified and reported SQL Injection, Reflected XSS, and broken access control aligned with OWASP Top 10.
- Deployed Splunk Enterprise for centralized log aggregation from 4 endpoints; authored 6 SPL correlation rules to detect brute-force, privilege escalation, and anomalous login activity.
- Designed and executed 3 phishing simulation scenarios using GoPhish and SET targeting mock corporate users; tracked open-rate, click-through, and credential submission across campaigns.
- Delivered a structured VAPT report with CVE references, CVSS v3 scoring, exploitation evidence (screenshots), and remediation recommendations using AI-assisted documentation workflows (Claude Code, MCP) — following PTES methodology.
- Applied AI-assisted workflow automation to support attack-path analysis and technical documentation throughout the engagement, improving reporting consistency and turnaround time.

TECHNICAL SKILLS

Pentesting & Exploitation: Metasploit Framework, Mimikatz, CrackMapExec, Impacket, BloodHound, Hydra, Netcat
Attack Techniques: EternalBlue (MS17-010), Pass-the-Hash, Credential Dumping, Privilege Escalation, Lateral Movement, Phishing
Web App Security: Burp Suite, OWASP ZAP, SQLMap, OWASP Top 10, SQLi, XSS, IDOR, Broken Access Control
Recon & Scanning: Nmap, Nessus, OpenVAS, Wireshark, Gobuster, Nikto, enum4linux, Netdiscover
SIEM & Threat Detection: Splunk Enterprise (SPL), Elastic Stack, Kibana, Sysmon, Windows Event Logs
Social Engineering: GoPhish, SET (Social Engineering Toolkit), Phishing Template Design, Campaign Tracking
Frameworks & Methodology: MITRE ATT&CK, OWASP, PTES, CVSS v3, CVE Analysis, Kill Chain, Pentest Report Writing
AI-Assisted Offensive Security: Claude Code, MCP (Model Context Protocol), AI Workflow Automation, LLM-assisted Security Operations
Platforms: Kali Linux, Windows Server 2008/2019, Active Directory, VirtualBox

SECURITY PROJECTS

AI-Assisted Active Directory Attack Simulation — Full Kill Chain • VirtualBox Lab • Metasploit • BloodHound • Mimikatz • Claude Code

- Replicated an enterprise attack scenario: initial access via EternalBlue → SYSTEM shell → Mimikatz credential dump → lateral movement via Pass-the-Hash → BloodHound-mapped privilege escalation to domain admin.
- Produced a professional pentest report documenting the full kill chain with CVSS v3 scores, attack evidence, and domain hardening recommendations, using AI-assisted documentation workflows to accelerate report drafting.

Phishing Awareness & Social Engineering Assessment • GoPhish • SET • OSINT

- Designed 4 targeted phishing templates (credential harvesting, malware lure, pretexting) using OSINT-gathered context; deployed via GoPhish with tracking pixels and redirect pages.
- Documented campaign metrics and compiled an AI-assisted awareness report with user-behavior analysis and recommended security awareness training controls.

Detection Engineering Lab — SIEM with Splunk & Elastic Stack • Splunk • ELK • Kibana • Sysmon

- Ingested and normalized Windows/Linux logs across multiple virtual endpoints; built detection dashboards in Kibana covering brute-force, lateral movement, persistence, and privilege escalation indicators; validated alerts against simulated attack traffic, using AI-assisted workflow automation to speed up correlation-rule documentation.

CERTIFICATIONS

CRTA — Red Team Analyst
WEB-RTA — Web Red Team Analyst
MCBTA — Multi-Cloud Blue Team Analyst

COPO — Offensive AI Operator
API-RTA — API Red Team Analyst
ISC² CC — Certified in Cybersecurity

ACHIEVEMENTS & COMMUNITY

- NCC 'C' Certificate — Alpha Rank:** Attained the highest achievable NCC certification with Alpha grading; recognized for discipline, leadership, and national service commitment.
- GitHub — Yaman-RedTeam:** Published penetration testing reports, SIEM lab documentation, security notes, and cybersecurity learning resources covering hands-on offensive security topics.
- Cybersecurity Content Creator (YouTube: @yamanredteam / Instagram: @yaman.redteam):** Produces educational content on Red Teaming, AI-Assisted Offensive Security, Web Security, API Security, and Active Directory, building a community around practical cybersecurity labs.
- TryHackMe:** Completed multiple Web Security, Network Security, and Red Teaming learning paths while practicing hands-on offensive security techniques in lab environments.

EDUCATION

Master of Computer Applications (MCA) — Cybersecurity • Amity University Online 2024 – 2026
Bachelor of Computer Applications (BCA) — Cybersecurity & Forensics • Babu Banarsi Das University 2021 – 2024
